

## Extra Story Update User

As a user

I want to be able to edit users

So that I can edit my information

### WireFrames:

Home Overview Register

Name

First name

Email

Role

Team

### Acceptance Criteria:

- From the user overview page, I should be able to navigate to a update form
- User can update name, first name , email and select a team and role
- Email must be unique
- All fields mandatory
- If a mandatory field is filled in incorrectly a server-side error shows up on the form.
- After he clicks on update and everything is filled in correctly, the user overview page is shown with the updated user.
